Vienna Cognitive Science Hub

Vienna CogSciHub Talk Series 2019/2020

Interdisciplinary Research Topics in Cognitive Science and Neuroscience

15:00-17:00
Lecture Hall G
Faculty of Psychology
Liebiggasse 5,
1010 Vienna

5 December 2019

From connectome to function:
mechanisms underlying neuronal
population dynamics in the
nematode *C. elegans*

Manuel Zimmer (Department of Neurobiology,
University of Vienna & Research Institute of
Molecular Pathology (IMP), Vienna)

16 January 2020

Neuroinformatics

Moritz Grosse-Wentrup (Research Group Neuroinformatics,
Faculty of Computer Science, University of Vienna)

23 April 2020

Neural bases of language
learning, expertise
and dysfunction

Narly Golestani (Brain and Language Lab,
Department of Psychology, Biotech Campus,
University of Geneva, Switzerland)

18 June 2020

Con espressione!
Artificial intelligence and music

Gerhard Widmer (Institute of Computational Perception,
Johannes Kepler University Linz)
